Supplementary Table 3. Mixed Effects Linear Models coefficients. Tables **a** and **b** show model fixed and random effects, respectively. Tables c show ANOVA tests. Tables d and onward show contrasts computed with *emmeans*. STs are ordered as below.

3.1 – Accuracy
3.2 – Response Times
3.3 – EEG Amplitudes **Cz – N400**
3.4 – EEG Amplitudes **Pz – N400**
3.5 – EEG Amplitudes **Cz – LPC**
3.6 – EEG Amplitudes **Pz – LPC**

Model 3.1: Accuracy (GLMM binomial)
